

Pedro Meaud

Full Stack Developer

I was a Law student working as a part-time bartender and decided to do an extreme change in my career by starting to learn how to code. I fell in love with it right away, Ironhack Web Development Bootcamp gave me the knowledge to pursue my dream, and now the aim is to continue to learn and grow as a Web Developer and look forward to find a company to grow with.

PERSONAL PROJECTS

Nevesco (06/2020 - 06/2020)

- This is an accounting company website. Completely mobile, created with HTML, CSS and Javascript. Has features like Google Maps API, email sender and Google Analytics.

Friend's Trip

- Friend's Trip is a personal assistant for travelling. You can search for places in different countries, share your favorite spots with friends, and easily translate from any language to English. App developed with express.js and running on Node.js. Uses responsive voice (text-to speech) API, HTML 5 speech recognition (speech-to-text) API, and Google API's: Maps and Translate.

Bottle Cocktail (09/2020 - Present)

- Bottle Cocktail is an original project created by me with the purpose of bringing to the public personalized cocktails with quality in a bottle, without them having to leave home. It will be an E-commerce web page, using technologies like, React.js, Redux, Axios, Node.js, Express.js, Mongoose, MongoDB.

UDEMY
